

MULE SX / MULE SX 4X4

Durable and reliable, the MULE SX series are your dependable working partners. Take the MULE SX wherever it is needed thanks to compact dimensions. Once on-site the 2-wheeldrive MULE SX is always ready to roll on its 22" off-road tyres, while for tougher terrains there is the MULE SX 4x4 with 24" off-road tyres. A 16-litre fuel tank extends the operational range of the SX with its fuel-efficient and powerful 401cc four-stroke engine. Familiar automotive dashboard design ensures ease of operation while a host of features guarantee ride comfort and convenience.

DASHBOARD

Drawing on the design of the PRO Series console, the dashboard puts all controls within easy reach and sight of the operator. Thick-grip steering wheel aids comfort.

ENGINE

The 401cc, four-stroke, OHV, air-cooled engine is compact, light, durable and delivers its power reliably and economically with a restricted top speed of 40km/h (25mph).

CHASSIS

A tubular steel chassis provides the best balance of rigidity, strength and ride comfort. Independent front suspension and rack-and-pinion steering aid traction and handling.

TILT STEERING

The PRO Series style thickly padded steering wheel can be tilted through 29° to suit operator preference and facilitate a quick and easy entrance exit, making getting in and out of the MULE easier.

CARGO CAPACITY

The easy-to-load tilting cargo bed can carry up to 181 kg of tools and materials while an additional 500 kg can be towed behind the ever-eager MULE.

BIG WHEEL 4X4

The MULE SX 4x4 has large 24" off-road tyres making it even easier to tackle rough terrain. Hi-Lo dual range auto transmission with rear diff lock enhance traction.
